

Grading system

The total performance of a student in a given course is based on a scheme of continuous assessments. For theoretical courses this continuous assessment is made through homework, assignments, attendance, quizzes etc., a mid semester and semester final examination of three / two hours duration. The distribution of marks for a given course are as follows:

I. Assessment	30%
II. Mid Semester	20%
III. Final Exam	50%

**grading
system**

The assessment in laboratory / fieldwork courses are made by observing the student at work in class, viva voce during laboratory hours and quizzes.

For students, assessment in design / drawing would be done through evaluation of a number of projects assigned to students throughout the semester. Each course has a letter grade equivalent to certain number of grade points.

Letter grades and the corresponding grade points are as follows:

Numerical Grade	Letter Grade	Grade Point
80% and above	A+	4.00
75% to less than 80%	A	3.75
70% to less than 75%	A-	3.50
65% to less than 70%	B+	3.25
60% to less than 65%	B	3.00
55% to less than 60%	B-	2.75
50% to less than 55%	C+	2.50
45% to less than 50%	C	2.25
40% to less than 45%	D	2.00
Less than 40%	F	0.00
Exemption	E	---
Incomplete Work	I	—
Withheld	W	---

grading system

A student's performance is measured by the number of credits that he or she has completed satisfactorily and the weighted average of the grade points that he or she has maintained. A minimum GPA is required to be maintained for satisfactory progress and minimum number of earned credits should be acquired in order to qualify for a degree.

The courses in which a student has obtained D or higher grade will be counted as credits earned by him or her. A student who obtains an F grade in any course in any semester will have to repeat the course. If a student obtains a grade other than F in a course, he or she will not be allowed to repeat the course for the purpose of grade improvement. F grades will not be counted for GPA calculation but shall be mentioned on the grade sheet and transcript.

The GPA is computed in the following manner:

$$\text{GPA} = \frac{\text{E(Grade Points X Credits)}}{\text{E credits}}$$

Where, Grade points are points against letter grades A+, A, A-, B+, B, B-, C+, C and D. Credits are only for those course attempted at this university.
