PART ONE: English
Time: 30Minutes
Instructions:

A) Answer all the questions
B) Figures in the right hand margin indicate full marks
C) All answers must be given on the answer sheet.

1. Read the following passage carefully and answer the question that follow:

Nobel prizes are awarded every year for outstanding achievements in the fields of science, literature and for promoting world peace. Under this prize, the prize winner gets a gold medal, a certificate and a large sum of money. The noble prize is the world’s most important prize. This prize is given to the persons with most outstanding contribution in six fields, namely, physics, chemistry, and literature, physiology in medicine, peace and economics. Economics was added in the list in 1969 for the first time. One prize is awarded in each field. If there are more than one recipient of the prize in one field, the prize money is equally distributed amongst all winners.

The prize was instituted by a man who was the inventor of the science destruction. This scientist was Alfred Bernhard Nobel. He was born in Stocholm on 21st October, 1833 and he died on the 10th December, 1896. Though he was a citizen of Sweden, he was educated in Russia. He invented dynamite. This material is widely used for breaking rocks, digging petrol wells, and in wars. For this valuable discovery Nobel became famous all over the world. He earned a huge sum of money from selling it. At the time of his death in 1896, he left behind a fabulous sum of 90,00,000 dollars. He left a will indicating that the interest on this money should be given as prizes to persons for their outstanding contributions in physics, chemistry, medicine, literature and peace. This prize was named as Nobel Prize. The first Nobel Prize was given to Roentgen on 19th December, 1901 for his outstanding research on X-rays. The prize money was 40,000 dollars. The winners of this prize are treated with great respect all over the world.

A. Are the following statements correct or incorrect? Correct the incorrect ones.
