

World Water Policies: Looking back and thinking ahead

DEV Research Seminar Programme 2011

Speaker	Dr Muhammad Mizanur Rahaman, Visiting scholar at the Department of Geography, University of Cambridge
Date	Wednesday 19 October
Time	3.30 - 5.00pm
Location	UEA Arts Building, Room 01.02

About the seminar

Contemporary world water management policies and associated principles have been developed and evolved over the past few decades during different international events. However, almost every year, new world water events are being organized that offer new water policies and principles. The key question is: whether we learned from those previous developments or are we jumpstarting offering new water policies and principles just for the sake of producing something new? This lecture attempts to stimulate our current understanding about world water policies development.

About Muhammad Mizanur Rahaman

Muhammad Mizanur Rahaman is currently a visiting scholar at the Department of Geography, University of Cambridge, England. He is a researcher at Water and Development Research Group, Aalto University School of Engineering, Finland. Previously, he was a visiting scholar at University of Toronto, Canada. His research interests are global water policies, integrated water resources management, transboundary river basin institutions and conflicts. Rahaman is a member of International Water Resources Association, Finnish Association of Civil Engineers, International Water History Association, International Law Association and Cambridge Union Society. Rahaman is serving as an editorial board member of the Journal Sustainable Society. Previously, he served as an editorial board member of the Journal Water International (2007-2010).
